-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 1 and 4 are objected to because of the following informalities: In claim 1, line 5, "Once" should be changed to —once— and in claim 4, line 1, "any one of" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bousseau et al.'751 (Bousseau) in view of Wahls '430. Bousseau discloses a mechanical picker (figures 1-13) for use in collecting asparagus spears (as seen in figures 1-3), the picker including a picking assembly (10,11) and a picking carriage (generally 3). Further, Bousseau discloses the picker being self propelled (column 3, lines 56-68) and having a gripping assembly (tongs, 10) as well as a control means to

determine position and operation of the gripping means (column 4, lines 7-43) but fails to show the use of a severing means or a device which moves the picking assembly rearwardly relative to the carriage. However, Wahls teaches that it is well known to employ both of these in concert with an asparagus picking machine (figures 1-6). Wahls discloses a severing means (as seen in figure 4) which is employed in concert with a rearwardly translating means 66. Wahls also discloses that it is known to propel such a device by means of a host vehicle 50. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the picker of Bousseau with the teachings of Wahls in order to provide a picker having greater operational range.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert E Pezzuto whose telephone number is (703) 308-1012. The examiner can normally be reached on 7:00 am to 5:00 pm.
